

Get trained. Get out alive.

ConfinedSpaceREADY™ safety training is essential for any employee working in confined spaces. Get ConfinedSpaceREADY™ today.

With Health Security & Education's **Confined Space READY** certification, you'll have the essential skills to prevent or rescue workers from confined space injuries. Our course is designed to create awareness of hazards, precautions, and the regulations associated with this type of potentially dangerous work.

Whether you need new or re-certification the Health Security & Education **Confined Space READY** training course will give you the knowledge to help keep you and your crew safe on the worksite.

Confined Space READY is the right choice.

- Advanced mobile simulation area for a realistic training experience rescuing injured personnel in confined spaces
- Utilising a practical hands-on approach, your personnel will be trained by specialists in the field or at your workplace
- Our trainers have the experience and expertise to assist your crews in gaining the competencies necessary to complete your confined space tasks
- Health Security & Education can also assist you in purchasing the confined space equipment necessary to complete these tasks
- Breathing apparatus* module is available in conjunction with Confined Space Entry training

Health Security & Education
