

Get trained. Lead by example.

LeadershipREADY™ safety training is essential to motivate and ensure the safety of every employee on the job site. Get LeadershipREADY™ today.

Safety is the primary concern on industrial work sites and all incidents and injuries can be prevented if proper safety measures have been taken. Proper safety leadership training enables managers and supervisors to drive the message of optimum safety down to all levels of your organization. Health Security & Education's **Leadership READY** training will provide you with the communication and leadership skills for effectively managing safety within your organization.

Whether you need new or re-certification the Health Security & Education **Leadership READY** training course will give you the knowledge to help keep you and your crew safe on the worksite.

Leadership READY is the right choice.

- Develop the skills to effectively communicate safety issues to employees at all levels
- Learn to identify hazards at work, assess the associated risks and plan a course of action
- Plan and conduct safety investigations by gathering information and evaluating the findings
- Identify actions and recommendations and learn to prepare and present effective reports
- Design and initiate safety programs that motivate and maintain employee interest and participation
- Gain a clearer perspective of the components and steps necessary for improved staff performance through effective team leadership

Health Security & Education Basic Leadership READY Training Includes:

RIIRIS301D	Apply Risk Management Processes
RIIWHS301D	Conduct Safety & Health Investigations
RIICOM301D	Communicate Information
RIIRIS402D	Carry out the Risk Management Process

(Also known as the G1, 2, 8, 9 Supervisor Course)
